# Shade and Ornamental Nursery Stock,

GROWN AND FOR SALE BY

CHAS. B. HORNOR & SON, Horticulturists and Nurserymen, Mt. Holly, Burlington Co., N. J. **SPRING, 1902.** 

"The Queen of Evergreens," Surpassing all others in elegance and grace. A perfect vernal fountain all the year round.

Everything offered in this Catalogue we have in 1902 stock, and growing on our own grounds.

Note our SPECIAL LOW PRICES ON MAPLES, ALL KINDS. Personal inspection of our Nurseries is earnestly solicited.

#### NOTICE TO PURCHASERS.

Prices in this Catalogue Cancel all Previous Quotations.

#### LOCATION.

Our Nurseries are located on the eastern border of Mount Holly, N. J., 20 miles northeast of Philadelphia, 19 miles south of Trenton; 16 trains (Pennsylvania R. R.) run daily to and from Philadelphia, Market street wharf, with daily freights to and from New York, Philadelphia and all other points.

#### GENUINENESS.

Our stock is grown under our personal supervision, the greatest care possible being exercised in keeping varieties true and unmixed; and we warrant them true to name, with the understanding and with this agreement between the purchaser and ourselves, that should any prove not so to be, we will replace them with the gen-uine, but will not be liable otherwise. All persons en-trusting orders to us, either verbally or in writing, are understood as accepting these conditions.

#### ORDERS.

These should be written distinctly, being particular always to mention height and size as given in this List. In ordering please conform to the sizes named herein. The name and address of the party ordering should be given in full and very distinctly, particularly the name, with every order or letter. Also state whether to be sent by freight or express. Early orders are always most satisfactory. All orders to be sent C. O. D. must be accompanied by one-fourth the amount in cash. Orders for trees, plants, etc., will receive prompt attention if sent by mail or otherwise. All articles, after free delivery to forwarders in good condition, are entirely at the risk of the purchaser, and no claims will be allowed unless made upon receipt of goods. Should any loss or delay occur, the forwarders alone must be held accountable and responsible.

#### PACKING.

Special pains are taken to pack all orders as lightly as is consistent with their safe transportation, and it is executed with the greatest care under our own supervision, for which a charge is made merely for cost of

#### PACKING SEASON.

For Spring usually begins from the middle to last of March (according to the weather) and in the Fall commences in September and continues until the ground freezes so that we cannot dig stock.

#### NOTICE TO LARGE BUYERS,

The Trade, Dealers, Landscape Gardeners, and those improving Parks, Cemeteries, Private Estates and Building Lots are invited to examine our Stock before

#### TERMS.

Net Cash, except by Special Agreement, or unless the purchasers are regular well known customers, who have settled former bills promptly upon presentation.

Chas. B. Hornor & Son.

Where diameter is mentioned, the distance through the branches is to be understood, and by caliber the distance through the trunk.

NOTE—Particular attention is invited to our large stock of Maples and especially to the prices at which we offer them. They are all of our own growing (from seed of our own saving), having all been transplanted one or more times in nursery rows, from four to six feet apart, and are young, thrifty and well rooted.

One of the finest of Street, Shade or Lawn trees; of large size, perfect outline; compact in form; with deep green, large, heavy, broad foliage, making a dense shade; changing to pleasing shades of yellow in Autumn. One of the finest and best trees for Shade and Ornamental planting. It is very hardy, long-lived, and free from insects and disease. Growth rapid.

			9

The above Norway and Sugar Maples have all been transplanted; grown in nursery rows four feet apart, and are nice trees, just right for transplanting into nursery rows, and are very cheap.

Note the very low prices at which we offer our shade trees.

6.6	5 to 6 in. cal., each \$5 to	\$10	).			

A very popular American tree, and for its dense shade, stately form and fine foliage (which is beautifully thited in Autumn), it is ranked among the very best. It is a vigorous grower, with remarkably straight trunk, even when young, and besides being one of the very best shade trees, it is valuable for its wood and production of sugar. The Norway, with the Sugar Maple and some of the Oaks, we consider the most valuable trees under cultivation for Avenue, Lawn or Park Planting.

4.6	8 to 10 ft, " "	1 00	8 00
6.6	5 to 6 ft, " "	00	4 00

The above Silver Maples are growing in our young, thrifty apple and pear orchards, and must be removed, hence the very low prices named above.

Silver Maples not so straight as the above first-class trees, at 50 per cent. discount from the above named prices. Extra Selected Silver Maples at 25 per cent. additional to above prices of first class trees.

For producing a quick shade, and especially for street planting, there are few trees superior to the Silver Maple. It is free from disease, and is the most rapid grower of all the Maples. This tree should not be confounded with the almost worthless Silver Poplar, which suckers badly from the roots—the Silver Maple does not sucker

Our Shade Trees have been frequently transplanted, and are well rooted.

The Pin Oak is one of, if not the most rapid grower of the Oaks with handsome, deeply-cut, shining, green foliage, turning to crilliant colors in the Autumn. It is easily distinguished from all others by its conical habit of growth, with its branches drooping that the lower ones touch the ground, as it increases in size. It is easily transplanted, and is considered one of the best of the Oak (antily

The Willow Oak forms a very dense, symmetrical, round-headed tree, with very handsome, shining, willow-like foliage, very distinct and effective, an admirable tree for Avenues, Lawns or Parks; rowth very rapid. Better speciments than those we offer above of he Willow Oak can hardly be found, and they are very cheap. They are well supplied with fibrous roots.

## Evergreen Trees.

We have a Large and Fine Assortment of Handsomely Grown EVERGREEN TREES, grown in nursery rows, with plenty of room for perfect development of branches, and they are furnished with an Abundant Supply of Fine, Fibrous Roots (having land well adapted to the growth of Good Evergreens) and they have all been Two OK MORE TIMES TRANSPLANTED, except where noted. Most of them have been transplanted within the past three seasons, and are first-class in every respect.

Try some of our Dwarf Arbor-Vitæ; they will please you. They are perfect specimens and well rooted.

#### ARBOR VITÆ. Continued,

Peabody's Golden Arbor Vitæ is decidedly the finest ever introduced. The foliage is richly tinted with deep golden yellow, which color it retains throughout the year. It is of strong growth, very hardy, beautiful and extremely showy.

The remarkably upright, dense growth, rich, dark green foliage (retaining its color remarkably well through the entire season) and exceeding hardthood of the Pyramidal Arbor-Vitæ, render this tree of the Greatest Value, especially for Cemetery Planting and Small Grounds. It is of the same habit as the Irish Juniper, and is decidedly more valuable for its superior hardiness and beauty, and is of inestimable value for screens and hedges, as it needs very little shearing. For Ornamental Planting it is one of the Very Best Arbor-Vitæs grown.

#### RETINOSPORA, OR JAPAN CYPRESS.

All of the Retinosporas, or Japan Cypresses, are beautiful, and a great acquisition to our list of Evergreen Trees; being very easily transplanted they should be more generally planted.

The price at which we offer them gives every one and

opportunity to try at least a few of them.

It is impossible to convey an adequate idea of the branty of these trees, either from cuts or description. They must be seen to be appreciated.

each \$12.00.

Of all the Sports emanating from the Retinosporas the one named above, grown by us from Retinospora Obtusa Nana, surpasses any that it has been our privilege to behold, in elegance of form, color rapid growth and hardillood; two specimens in our possession, IR years old, being 20 feet in height and 10 feet in diameter of branches, never having been in the least injured by the cold, having withstood 220 below zero. From our acquaintance with this tree we think it will be a great acquisition to the list of large growing Evergreens. In leaf it is somewhat similar to Retinospora Obtusa, but not so still looking; of more graceful form, with spreading, slightly drooping branches. The rich, dark green color of the foliage, graceful habit and rapid growth of this tree will cause it to be greatly appreciated.

Of the many Retinosporas (all of which are valuable) this is one of the most beautiful and useful. It is entirely hardy, of good growth, and each branch is deeply tipped with the brightest golden, which it retains throughout the year. The foliage is exceedingly time and soft, resembling, as its name implies, a golden plume, and is superlatively beautiful.

# CALIFORNIA PRIVET.

(Ligustrum Ovalifolium).

An exceedingly beautiful, nearly evergreen shrub; pyramidal form; very vigorous and hardy; leaves deep green, bright and very glossy; bears spikes of fine, white flowers in June: highly ornamental. This is decidedly superior to all other plants for hedges. Especially adapted for hedges at the sea-shore.

	Per	10.	Per	100.	Per 1000.

2	yrs, 3 to 3½ ft, well branched	40	3	00	25 00

All of our two year Privet were transplanted and cut back to the ground last Spring; part of them were again cut back in midsummer to about eight inches from the ground, which latter are short, bushy plants, and will be sold at the same price as the above, for the same grade of plants. Our one year Privet were all cut back in mid-summer to 4 in. from the ground, and are very bushy plants

#### NEW SHELLBARK -- "HORNOR'S SPECIAL."

Original tree considerably over 100 years old, yet healthy, vigorsus and sound in all its parts, and apparently good for 100 years
was are it runk measuring 9 feet, 4 inches in circumference, two feet
from the ground. A regular and annual bearer, having failed but
one year within the memory of the writer (55 years). Crop last
season (189) three and one-quarter bushels; nuts medium to large,
smooth, thin shell, with long, square sides, of a beautiful brownish
color; of high nutry flavor; when cracked kernels part freely in
salves from shell, making it desirable as a commercial nut as well
as for family use.

## SHELLBARK, HORNOR'S SPECIAL.

## Gertificate of Inspection of Nursery Stock.

State of New Jersey, State Board of Agriculture.

Office of the State Entomologist, John B. Smith, Sc. D.

This is to certify that I have this 29th day of January, 1902, inspected the nursery stock included in the wholesale catalogue of shade and ornamental stock for the Spring of 1902, grown and for sale by Chas. B. Hornor & Son, at Mount Holly, Burlington County, New Jersey, and I find that such shade and ornamental stock is appropriate free from San Long Scales or the stock is appropriate free from San Long Scales or the stock is appropriate free from San Long Scales or the stock is appropriate free from San Long Scales or the stock is appropriate free from San Long Scales or the stock is appropriate free from San Long Scales or the stock in the stock is appropriate free from San Long Scales or the stock in the s stock is apparently free from San Jose Scale or similarly injurious insect pests.

This certificate is limited to the stock above mentioned and for the shipping season of the spring and

summer of 1902.

JOHN B. SMITH, State Entomologist.

New Brunswick, Jan. 30, 1902.
